## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 08/12/2004 has been entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 6-9, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Moskowitz et al. (U.S. 5,891,147).

Moskovitz et al discloses in figures 14 and 17-24, an elongated solid body (85) having a blunted distal tip (82) and a tool portion (81) at the proximal end, wherein said body (82) is inherently capable of having a diameter greater than one and a half millimeters and also substantially equal to five millimeters and plurality of dilators (105,111).

**Claim Rejections - 35 USC § 103**

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 5 and 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Moskovitz et al. in view of Pattison (U.S. 6,010,520).

Moskovitz et al discloses the claimed invention as states above, except for the solid body dilator includes indicia indicative of a graduated scale. However, Pattison teaches that it is known in the surgical art to have indicia indicative of a graduated scale disposed on the dilator.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the Osada's solid dilator with indicia indicative of a graduated scale disposed thereon as taught by Pattison in order to allow the physician utilized the depth of the dilator.
